ROBIN

SmartPAT 5000 & 3000
PAT Testers

SmartPAT 5000

The **SmartPAT 5000** and **SmartPAT 3000** have been widely accepted for commercial Portable Appliance Testing requirements.

SmartPAT 5000 is purpose built to handle hundreds of appliance test results. Just enter one of the pre-programmed test codes and **SmartPAT 5000** will guide you through the test sequence. Nothing could be easier.

In addition to its pre-programmed test sequences, **SmartPAT 5000** is fully programmable allowing the user to formulate unique test sequences for specific applications. At any point the **SmartPAT 5000's** unique dedicated help facility can be called up to give instant user assistance.

SmartPAT 5000

Results of each test are assigned unique references and stored in the on-board computer. When testing is complete, results can be downloaded to a computer using Robin's **PowerPAT Plus** Software or directly printed out on Robin's **SP1000** printer or other compatible serial printer.

Using the optional wide-head barcode scanner, appliance number, site details and test sequences can be rapidly entered directly into **SmartPAT 5000**.
